

key

module pins (socket, 2x8)

left column, rows A-H:

DRDY MISO MOSI SCLK

CS CLK DVDD DGND

right column, rows A-H:

AIN0 AIN1 AIN2 AIN3

REFN0 REFP0 AVDD AGND

R2a R2b R1a R1b = 1.2k

C1 C2 C3 = 100nF

wire colours:

GND grey, 3V3 red

x dark blue, y light blue

a/2 orange, a green

SPI and DRDY purple

filled dot = soldered hole

plain hole = free / passed over

R1a spans 2 holes: keep wires

out from under its body

one GND wire runs under the

socketed module

print at 100 percent, no scaling
